## 🪪 PROFILE

Committed and motivated student of programming at 42 Abu Dhabi. I have a strong foundation in several important areas, such as web technologies, Object-Oriented system programming, and algorithms. I have an excellent foundation in these areas from my education and experience, that allows me to take on difficult problems and produce effective answers. I am eager to use my vast expertise and knowledge in a challenging and exciting developer position where I can support innovative projects and advance my career.

---

## 💼 PROFESSIONAL EXPERIENCE

**Operation Agent (Team Leader),** *DHL WORLDWIDE EXPRESS LLC*　　Feb 2021 – Jul 2023
Dubai, UAE

- Developed a Dashboard that displays employees' performance in real-time, motivating them to work more efficiently and significantly increasing workflow.
- Automated several Excel files using Excel Power Queries, resulting in increased productivity and time savings that could be utilized on other tasks.
- Effectively led a team of 16-20 people, ensuring on-time package delivery and compliance with customs requirements.
- Generated thorough reports and addressed system-related difficulties.

**Front End Developer,** *Emirates Engineering*　　Sep 2019 – Feb 2020
Dubai, UAE

- Assisted with the creation of dashboards and systems utilizing SharePoint and JavaScript.
- Collaborated with developers to design two dashboards for the Engineering department that used SharePoint lists and web components.
- Used vanilla JavaScript to provide interactive features and improve the dashboards' user experience.
- Worked closely with SharePoint lists and online APIs to extract and manipulate data for smooth dashboard integration.
- Played a critical role in ensuring that the dashboards and systems met and effectively addressed the Engineering department's needs.

## 🎓 EDUCATION

**Diploma of Software Development,** *42 Abu Dhabi*                    Jul 2023 – Present
  **Relevant Coursework:**                                                 Abu Dhabi, UAE

  - Algorithms & AI                      - Network & System Administration
  - Object-Oriented Programming          - System Programming
  - Web Technologies & Graphics

## 📁 PROJECTS

**Minishell,** *42 Abu Dhabi*                                                    Dec 2023
  - **Key Functionalities**:
    - **Skills Gained**: Hands-on experience in system programming and process management within Unix/Linux environments.
    - **Challenges**: Designed an efficient, user-friendly command-line interface while adhering to Unix shell standards and conventions

**Employee Dashboard,** *DHL Worldwide Express LLC* 🔗                              Jan 2023
  - **Technology Used**: Built using JavaScript, Chart.js, and Bootstrap.
  - **Real-Time Insights**: Provides performance and productivity charts, along with detailed data on work hours, goods processed, and orders fulfilled.
  - **Decision-Making**: Enables informed decisions that streamline workflows and optimize resource allocation.
  - **Productivity Boost**: Has led to increased productivity and significant cost savings.
  - **Employee Engagement**: Fosters a more motivated and engaged workforce through performance recognition and rewards.

## 📑 CERTIFICATES

**THE WEB DEVELOPER BOOTCAMP 2021** 🔗
  **Issuing Organization:** Udemy
  **Date Obtained:** August 25, 2021
  **Description:** A comprehensive course on full-stack web development, encompassing HTML, CSS, JavaScript, Node.js, Express, MongoDB, and responsive design. The bootcamp focuses on practical, hands-on projects for developing real-world web applications and honing coding abilities

## 🧠 SKILLS

**Hard Skills**

  - C, C++, JavaScript, HTML, CSS
  - Minilibx, Node.js, React.js, MongoDB, MySQL
  - Git, Docker, SharePoint, Unix System Calls
  - Web APIs, HTTP, Networking
  - OOP, Multithreading Multiprocessing
  - Excel, Power Query

**Soft Skills**

  - Attention to Detail
  - Discipline
  - Leadership
  - Problem-Solving
  - Testing
  - Debugging

## 🎖 AWARDS

**COMPUTER VISION HACKATHON,** *42 AD X AHB*                    13 Sep 2023

I took part in a computer vision hackathon where my team created a basic application that recognizes traffic signs from pictures and computes the penalty for violating the regulations. TensorFlow was used to train the AI model, which demonstrated our proficiency with machine learning and computer vision by correctly identifying a variety of traffic signs and providing the relevant penalty information.

**EMPLOYEE OF THE MONTH,** *DHL Worldwide Express LLC*                    Jul 2022

Recognized for impressive performance and accomplishments, including creating a JavaScript Staff Dashboard that engaged employees and significantly enhanced workflow, as well as automating Excel files with Power Queries to increase efficiency and save time
